### Building the World of Tomorrow

FIRST Robotics **Team 999** at Cheshire High School is preparing the science and technology leaders of the future. After their hands-on training and real-world experience at FIRST Competitions, many of our team members go on to careers in science, technology, engineering and math (STEM). Building a robot exposes **Team 999** members to science and technology and so much more. This experience helps our team gain valuable skills like critical thinking, problem solving, communication and leadership.

**Thank you  
For Your Support!**
